Hello Eligio,

In the relentless race against narcotics crime, the right technology can be a game-changer. Enhance your approach and unlock your investigations' full potential with cutting-edge tools.

Mark your calendars for August 28, 10 AM PT / 1 PM ET, for our impactful webinar, "From Tip to Takedown: Using ALPR and CrimeTracer to Strengthen Narcotics Investigations."

Our resident experts, Jamie Algatt and David Tawadras, are geared up to show you just how transformative technologies like Automated License Plate Recognition (ALPR) and CrimeTracer can be. In this webinar, you'll see how these tools can:

1. Use ALPR data to link vehicles to narcotic activities and track offender movements.
2. Utilize CrimeTracer to validate tips, reveal past complaints, and strengthen your investigations.
3. Navigate workflows that blend ALPR and investigative platforms for effective narcotics tracking across jurisdictions.
4. Increase case integrity and community impact through integrated tech, also covering post-conviction documentation and civil enforcement tactics.

Ready to upgrade your toolkit and make a greater impact in narcotics investigations?

Hope to see you there!
